Project Title: Issuance of a Hazardous Waste Facility Permit for Southern California Edison, San Onofre Nuclear Generating Station (SONGS) in San Clemente, California, EPA ID # CAD 000 630 921.

State Clearinghouse Number: SCH #2003081068

Contact Person: Walter Bahm Phone # (510) 540-3975

Project Location (Include County):

Southern California Edison
San Onofre Nuclear Generating Station
5000 Pacific Coast Highway
San Clemente, California 92672
San Diego County

Project Description:

The Hazardous Waste Facility Permit would allow for the storage of mixed waste. The permit authorization requires Southern California Edison, San Onofre Nuclear Generating Station (SONGS) to manage mixed waste in a manner that is protective of human health and the environment. The mixed waste is generated from on-site equipment and facility maintenance of turbine and pump oils, chemical cleaning, or painting projects. All mixed waste is generated from on-site activities. SONGS is limited to storing mixed waste in sealed containers, in secure, designated areas. No more than 56,750 gallons of liquid mixed waste and 87.5 cubic feet of solid mixed waste may be stored. Mixed waste storage is limited to one year. The storage of mixed waste is necessary to allow for the consolidation, profiling and the availability of off-site treatment and disposal facilities. The permit would allow SONGS to continue its existing storage units. All operations will occur in existing facilities.

Findings of Significant Effect on Environment:

(A copy of the Initial Study which supports this finding is attached.)

The Department has made the determination that the project will not have a significant effect on the environment.

Mitigation Measures: None
